SILVER TRAK DIGITAL

Provides the necessary link
between content creation
and monetisation through
the critical and professional
processes of Aggregation, QC,
Mastering, Transcoding
and Delivery.

Silver Trak Digital has over 30 years of experience in the media and entertainment industry, advising and supporting industry's largest and most well known content providers as well as the newest and most aspirational production businesses and festival promoters.

We have engaged and developed the brightest Media Technicians and we have grown partnerships with the most forward thinking and professional businesses in Australia and elsewhere - including AWS, Netflix and Telstra.

By providing a suite of critical services via innovative technical platforms we have the ability to ensure your content is received, mastered, transcoded, quality checked and delivered to anywhere across the world completely, securely and ON-TIME.

Our Mission is: *To ensure the creation of value to our clients' advantage.*

The background of the entire image is a composite. It features a world map with a dotted texture, overlaid with several white location pins. Thin white lines connect some of these pins, suggesting a network or data flow. In the foreground, a pair of hands is holding a smartphone horizontally. A bright, glowing light emanates from the screen of the phone, creating a lens flare effect. The overall color palette is warm, with shades of orange, red, and purple.

MEDIA ROOM MR3

The work-horse of Silver Trak Digital's services, Media Room provides the perfect platform upon which to receive, store, transcode and deliver/share content from, knowing that content files are secure, locatable and deliverable anywhere, anytime.

The SaaS platform provides complete ingestion of any media file and peripheral files into your designated Project space, securing the content to your permissions and storing files in immediately accessible S3 buckets ready for immediate delivery as a screener or hi-res download.

Media Room continues to be Australia's best utilised Asset Management SaaS platform providing large and small production and content producers the flexibility for securing valuable media files and transcoding them, providing immediate promotional screener deliveries with enhanced artwork capabilities or delivering downloadable hi-res master files.

The robust, sophisticated software application has been built totally in-house via Silver Trak Digital skilled technical team and reviewed and approved through the AWS Foundation Technical Review (FTR).

Supported by AWS S3 storage and utilising numerous AWS backend services, the Media Room platform provides slick file ingest, processing and delivery, providing reviewers and end users instant access.

OUR SERVICES

AGGREGATION / ACCESS SERVICES

Silver Trak Digital Is Your One Stop Digital Supply Chain

Format and Delivery to Specification

Many of the major and best-known OTT platforms utilize the professional services that Silver Trak Digital provides. Netflix, iTunes, Amazon Prime and others are all counted as our valued clients. Silver Trak Digital has been appointed as a Netflix Preferred Fulfilment Partner acknowledging our rigorous attention to detail, fast service and quality control standards.

Localisation

Closed Captioning

Silver Trak Digital can create or conform captions in a multitude of languages, and easily add them to your master video deliveries.

Audio Description

Utilising the latest AI technology, we provide a complete script to Audio Description providing audible scene and background definition, bringing enjoyment to all.

Subtitling

Together with our skilled partners we deliver high-grade locally sensitive, culturally aware, foreign language subtitles in 60+ languages.

Dubbing

Our Dubbing capability encompasses multiple languages and dialects bringing your content into an expected reality of voice and audio.

Quality Control

Evaluation to detect any video or audio anomalies, broadcast legality violations, and any other specific item requiring monitoring.

Project Management

Our project management team oversees the fulfilment of your order from inception through to delivery. With our experienced team you will always have a point of contact to keep you informed on the progress of your order.

Encoding and Transcoding

We work with all source formats and create metadata, captions, multilingual subtitles/audio dub tracks and deliver media in virtually all desired codec(s) in any format wrapper.

Digital Delivery

Silver Trak Digital's gigabit pipes coupled with Aspera and other available high-speed file transfer options get your job delivered in the quickest possible time.

Silver Trak Digital stores, conforms and delivers all ABC Content Sales' content worldwide.

Netflix Preferred Fulfilment Partner

- NPFPs are an elite group of carefully vetted and certified facilities.
- Selected to provide superior quality support services geared specifically to Netflix program preparation.
- Required to adhere to a rigorous performance standard.
- NPFPs are a key component to efficient and cost-effective Netflix asset deliveries from content providers.

BROADCAST DUPLICATION AND FILE BASED SERVICES

We can manage all forms of duplication from a single broadcast clone to multiple copies and formats. Within this service we offer HDCAM SR, HDCAM, Digital Betacam, DVCPro, DVCAM, HDV, SP Betacam, 1" C-Format, as well as handling many other legacy formats.

4K, SDR and HDR file-based workflows are no longer the 'talk of the future'. 4K workflows are here now and Silver Trak Digital is ready. We have invested in high-end technologies such as Resolve, Colorfront Transcoder and Graymeta Iris and we have the capacity to electronically receive and deliver large 4K files. Talk to us to see how we can assist in your 4K workflows.

With 30 years of experience in video technologies, Silver Trak Digital can guarantee the best possible conversions of your video source material. We can convert to and from any video tape format and standard, file based or video tape based.

TECHNICAL ASSESSMENT (QC) SD, HD AND 4K - SDR & HDR

Different broadcasters in Australia and around the world have different and changing technical requirements. Workflows are becoming increasingly file based which brings new challenges to Quality Control. Our Technical Assessment team will guide you through these requirements, based on the most exacting of standards, leaving your media acceptable for broadcast on just about any platform.

Silver Trak Digital now offer full 4K QC in our new upgraded 4K QC suite. We also offer Harding Flash Pattern Analysis (FPA).

Not only will Silver Trak Digital quality control the content of files, but also ensure the integrity of the file is sound and the file is playable on most known file players/systems, now and in the foreseeable future. This is a unique service not offered by any other company in Australia.

Changes in audio levelling from quasi PPM audio metering utilised in broadcast to Loudness Based audio levelling as well as other ongoing changes brings new challenges to Technical Assessment worldwide. Silver Trak Digital can not only assess your programs (tape or file) for these challenging changes, but fix audio discrepancies during the QC process.

Our Technical Assessment staff are widely credited with setting the standard for QC and technical assessment in Australia. They have worked with both local and international distributors in creating the benchmarks for technical assessment for SD, HD and 4K programs.

We provide our clients with the highest QC standards for every project and we stand firmly behind our products. We offer Technical Assessment Services to suit every workflow and deliverable requirements. Silver Trak Digital is a preferred supplier of Technical Assessment services for BBC in Australasia.

Silver Trak Digital is an approved 4K HDR Master QC facility for Netflix.

AUDIO SERVICES

Real time HD Frame rate conversions through the installation of our Snell 3Gbps Alchemist Ph. C-HD Standards Converter, as well as the Grass Valley Alchemist, cutting down on costs and time associated with this type of work.

Silver Trak has developed unique expertise in handling diverse audio requirements in duplication and encoding; audio playback, remapping channels, copying Dolby E during frame rate conversions and standards conversions, encoding and decoding Dolby data and embedding and de-embedding audio.

DIGITAL CINEMA MASTERING AND MANAGEMENT - DCP MASTERING AND LOGISTICS FOR CINEMA RELEASES

Silver Trak Digital embraces technology in all services, but none more so than our DCP and Mastering processes.

Our Services include:

- DCP Creation HDR, 4K, 2D, 3D with support from Éclair Color and Dolby EDR
- DCDM Productions
- DCP File Conversions
- KDM Generation and Management for ultimate delivery security
- DCP Duplication and Distribution Services

Since 2009, Silver Trak Digital has been mastering Digital Cinema in our fully DCI compliant suite – now using the latest Colorfront Transkoder technology for the fastest most reliable solutions on the market.

We handle all file formats for all kinds of projects including 3D feature films and multi-lingual subtitled releases, with quick turnarounds and distribution.

E-DELIVERY SERVICE FOR RAPID DISTRIBUTION

Silver Trak Digital DCP services have leapt to the next technology level forming a unique partnership with Telstra Broadcast Services to deliver motion picture content (DCPs) via the 5G network. Speed and security of content delivery to Cinemas has long been a problem even with latest version of electronic delivery, 5G changes all that enabling what was taking days to download available in minutes/hours.

While our HDD hardcopy deliveries will continue for our clients and their exhibitors, this network based distribution will expand our services by providing the option for a secure portal for order placement by both Studios and Exhibitors.

**OUR
SERVICES**

//continued

CINEMA DIRECT

The Future of Cinema Delivery and Live Streaming

Silver Trak Digital and Telstra Broadcast Services have joined forces to bring to you the most dynamic break through in Cinema and Entertainment history. Utilising the Telstra enterprise grade 5G network we can not only deliver content (DCPs, Trailers, etc.) in minutes rather than hours or days, but we can facilitate the exhibition of live streamed events.

Delivering at speed of up to 600mb/s provides not only fast, secure transport of the latest movie content but also opens the opportunity for live streaming. Put artists like Justin Bieber and The Black Eyed Peas in your cinema through a live streamed concert and bring crowds back to the theatre.

MULTIMEDIA SERVICES

Silver Trak Digital is the only Australian company to offer 4K Ultra HD Blu-ray authoring. We joined the UHDG focus group in early 2015 to lead the way for Australian companies to get access to this exciting technology. This shows our focus to continually bring the latest technologies to Australia and our support for the Australian film distribution community.

We use Cinemacraft HDe for Blu-ray encoding and Cinemacraft SP3 for DVD encoding; the best encoders in the world for DVD and Blu-ray. For Blu-ray authoring we use Scenarist; widely recognised as the leading Blu-ray software in the world today.

Additionally, we work with Adobe Premiere Pro edit packages.

DAMSMART DIGITISATION SERVICES

Acquired by Silver Trak in 2018; DAMsmart is Australia's leading audio-visual conversion and digitisation service provider. For over 15 years the team of professional film and format technicians have worked on some of Australia's and other countries' most valued film and tape archives.

Breathing life into legacy formats; DAMsmart has the equipment, experience and passion to understand the emotional, historic and financial value in archival content.

With the advances in digital technology and recording the life expectancy of aging formats has become critical, with an estimated 40% of archival content being lost forever through deterioration and poor preservation.

DAMsmart, now the largest commercial facility in Australia, has completed essential work for the National Archive of Australia, the National Film and Sound Archive, as well as similar works for Hong Kong Malaysia and South Africa with countless association, sporting organisations and commercial works also passing through their processes.

DAMsmart digitisation is the single necessary step between visually supported history and increasing forgotten stories.

A close-up photograph of a person's hands typing on a laptop keyboard. The background is a blurred cityscape at night with warm, bokeh lights. The overall color palette is dark with blue and orange tones.

OUR STAFF

We have highly trained and extremely motivated staff in all areas of our business. This level of expertise has allowed Silver Trak Digital to become a market leader within our range of services. Our staff is the heart, soul and intellect of our business.

TIM CRESWELL
**CHIEF EXECUTIVE
OFFICER**

tim@silvertrak.com.au

Tim has worked in the Film and Television Industry for over 20 years.

Tim started his career working for major Motion Picture studios and Video Distribution companies. During this time, he managed DVD and Blu-ray authoring businesses and tape duplication facilities. With a Bachelor of Business degree, Tim has experienced all aspects of the industry and understands working to tight deadlines and the necessity of getting things right the first time, from both client and supplier perspectives.

With this in mind, Tim set up Buff Dubs in 2005 and has seen the business grow into a substantial business with the ability to compete on any level across many services. The business has a focus on offering the best service and personal attention.

CHRISTIAN CHRISTIANSEN
**CHIEF OPERATING
OFFICER**

christian@silvertrak.com.au

With a Masters degree in Finance and Business Administration Christian has spent more than 25 years in the media and post services industry. Holding senior management roles for companies such as Sony Australia, Comcopy, Sydney Multimedia Company and Video 8; Christian is often called upon to present and talk about industry changes and technology advancements.

In January 2012, Christian acquired Silver Trak Digital from Video 8 and developed the tape sales, authoring and CD/DVD/Bluray services.

In March 2013 Silver Trak Digital merged with production and post-house company Buff Dubs Pty Ltd consolidating operations under the Silver Trak Digital banner.

Christian's industry knowledge, senior management and sales experience brought together and promoted the combined broadcast services of the two companies and commenced a solid expansion into Digital Broadcast and Media Asset Management.

Christian's unique understanding and solid knowledge of the Film and Television industry has allowed him to develop the business in a globalized marketplace targeting industry challenges to provide well placed and valued technology solutions for all industry players; government, sporting, corporate, theatrical and networks.

His experience and knowledge have grown the Silver Trak business from its early beginnings to becoming one of the largest commercial post-production services companies in Australia, with now expansions into South East Asia and New Zealand.

JOE KELLY
GENERAL MANAGER
DAMSMART AUSTRALIA / ASIA
joe@silvertrak.com.au

Joe Kelly is the co-founder and GM of DAMsmart and brings into the business an industry history and experience spanning some 30 years.

Joe spent several years working within the Broadcast industry in either supervisory or managerial capacities. Just prior to commencing DAMsmart he headed up the Preservation and Technical Services department for the National Film and Sound Archive of Australia and has developed a unique knowledge and experience in handling most (if not all) of the original

formats and motion picture mediums from film restoration and preservation through to tape, video and audio formats.

Joe has engaged in overseeing all of the projects undertaken by DAMsmart both within Australia and Internationally applying his knowledge and experience to ensure that the end result is a top-quality delivery. His expertise and focus on detail have made him one of the most sort after experts in the field of digitisation and conversion work and positioned DAMsmart as the single most professionally recognised digitisation company in Australia, Asia and elsewhere.

TIM SYMONS
VICTORIA STATE MANAGER
tims@silvertrak.com.au

Tim has over 25 years of experience in the radio, television, post production and broadcast services industries.

Commencing his career in Adelaide at 5DN, he later moved to SA-FM taking on the role of Production Manager and on-air announcer.

Looking for new challenges Tim took up a position as sound engineer for Audiobrien in Sydney, a role which lead to becoming the Promotions Audio Producer at Network 10. In 1991 Tim moved to Melbourne as the Production Manager for radio Triple M. His experience and industry knowledge made him the perfect candidate for AAV Australia operating their inflight entertainment division servicing clients such as Qantas, Ansett, Virgin, Jetstar, Vietnam Airline and Gulf Air.

More recently Tim was engaged as the Content Manager, Broadcast Services, APAC, for Deluxe Australia where he was responsible for the management of the content acquisition, logistics, operational and delivery needs of Deluxe's broadcast and non-broadcast clients. Tim's knowledge of the content and distribution

industries is second to none and is key to Silver Trak's expansion into the broadcast, media, production, distribution and corporate markets in Melbourne and Victoria.

ROB GALLIMORE **BUSINESS MANAGER**

rob@silvertrak.com.au

With over 25 years in Senior Management roles both within Australia and Internationally Rob has brought a depth of business knowledge to the media industry.

Degree qualified in Management and Marketing Rob's background spans over 20 years in Operational and General Management. With knowledge and experience in financial, contracts, strategic and personnel management.

Having run multi-site government and commercial contracts Rob has spent the last 8 years working within the media industry and has developed considerable understanding and insight into the technologies and challenges facing the production industry.

Bringing together his operational and general business knowledge Rob has a pivotal role in managing the multiple requirements to facilitate Silver Trak's development, expansion and marketing plans and deployments.

MATT CHRISTIE **NSW SALES MANAGER**

matt@silvertrak.com.au

Matt has over 20 years' experience servicing the Film and Television industry. Matt joined Beyond Distribution in 2001 first as Servicing Coordinator looking after clients such as Discovery Channel and National Geographic. Later Matt took on the role as Post Production Manager. During his time at Beyond, he gained knowledge in Post Production as well as local and international Program Distribution. In 2010 Matt joined Video 8 Media and soon gained the respect of customers as well as colleagues. Matt has a deep knowledge of distribution, broadcast & streaming requirements and has made many clients friends over the years.

ROD CAPON **TECHNICAL MANAGER**

rod@silvertrak.com.au

Rod completed his television operations techniques certificate in 1984 at North Sydney TAFE and subsequently commenced his career at Video 8 Media where he gained his diverse base in television, film, video, production, distribution and broadcast.

In 1990 Rod branched out to establish TVD Broadcast, a significant supplier of broadcast services in the Sydney Market. As GM of TVD Broadcast, Rod oversaw the quality control, domestic and international program duplication and distribution for companies such as Opera Australia, Grundy Television, Southern Star, Hi-5, Paramount Pictures, Universal Pictures and others.

During his 20 years at TVD Broadcast, Rod developed many skills in archival processes, managing many large Archive and Restoration Projects for clients such as Malcolm Douglas Films, Opera Australia and Grundy Television's

archival projects of Neighbours, Young Doctors, Prisoner and Son's & Daughters.

The skills acquired dealing with many old and troubled tape masters as well as developing clean archiving and restoration processes are second to none. Rod developed many new techniques to allow the transfer of old 8mm, 16mm 35mm film, 2" quad, 1"C, U-matic, 1/4" and D2 into digital formats. Many of these processes are utilised as standard archiving practices today around the world.

In 2010 Rod returned to Video 8 Media. He assisted in the development of the Video 8 Media cloud-based MAM solution, which helped Video 8 Media establish itself as a market leader in broadcast file-based content delivery systems. Rod's 28 years in the media industries, his ability to adapt in an ever-evolving media market as well as having a great knowledge of legacy formats, has held him in high esteem in the Broadcast, Archival and Distribution markets, locally as well as overseas.

JAMES DARTNELL **DIGITAL OPERATIONS MANAGER**

jamesd@silvertrak.com.au

James has over 17 years of experience across Post Production, Broadcast, Digital Cinema and Content Distribution.

Commencing his career at Technicolor London in 2001, he started out coordinating and scheduling the facility operations across Audio, QC, Edit and MCR. After stepping into the role of Head of Production, he successfully embedded the emerging technologies that would become the Digital Media department into the facilities' already busy production landscape.

After 11 years, James made the move to Sydney to look after operations for Technicolor

Australia's growing Digital Media Services department, working on content aggregation, content distribution, improving day to day operational efficiency as well as being instrumental in onboarding new clients and workflows.

Most recently James was Head of Digital Operations at Deluxe Australia responsible for the day to day operations across Digital Cinema, Media Services and Localisation. James has a desire to ensure clients' needs are met, on time, on budget, first time, every time.

STEVEN MARCUS

SOFTWARE DEVELOPMENT MANAGER

steven@silvertrak.com.au

Steven joined Silver Trak Digital in 2013. Steven has a B.A in Mathematics and Computer Science from Santa Clara University, California. He has over 20 years' experience as a senior software developer, having worked all over the world writing software for broadcast, finance and other industries. Steven has been instrumental in the development of Media Room and will be a key player for Silver Trak Digital in our further transition into cloud-based service offerings.

KARLZ VARMA

DIGITAL OPERATIONS MANAGER DAMSMART / SILVER TRAK – MALAYSIA

karlz@silvertrak.asia

Degree qualified in Communications and Media Management, from the University of South Australia; Karlz spent some 6 years working with the largest satellite television and radio broadcaster in Malaysia – ASTRO.

Her experience includes content acquisition, operations and delivery as well as project management.

Karlz was instrumental in the launch of TRX (The Right Exchange) through Asia, as well as project managing the market rollouts of HBO GO and Hello Channel for ASTRO.

On the operational front she has worked Aggregation services for IFLIX, Netflix, HBO, Turner, FOX, Disney and Discovery and is well regarded in coordinating these crucial content deliveries.

Karlz will now apply her experience and knowledge in establishing the new DAMsmart/ Silver Trak office and apply her skills to both Business Development and Operations Management.

T VIMALANATHAN (NATHAN)

VICE PRESIDENT – SALES ASIA

nathan@damsmart.asia

Nathan possesses superior abilities in managing country-level business development, with unique skills and experience in sales and marketing, bringing these talents to DAMsmart Asia by heading up the Asian Sales for both DAMsmart Asia and Silver Trak Digital.

With over 20 Years of field experience, he has established strong Governmental links in Malaysia and India with access to both State and Federal level Government entities.

Nathan is vastly experienced in conceptualizing, formulating, and promoting unique media products and services and has executed Joint-Venture initiatives with synergistic International business entities. He has a proven track record in building International smart partnerships and channels, building and promoting their related "go-to-market" plans.

Nathan has innate talents in conceptualizing, marketing and implementing "out-of-the-box" business strategies for market-driven services and productization.

OUR OFFICES

SYDNEY

10 Addison Rd, Marrickville, NSW

Head Office for Silver Trak Digital, the office houses equipment and talent for the provision of all the services offered under the Silver Trak umbrella.

Bringing together the combination of aggregation, post-production, QC and mastering services the office is the focal point for communications and future development.

Housing over 30 personnel the building has been going through a transformation every year in physical and technological form. Equipment upgrade has seen the latest server and internet transfer technology implemented to service our depth of clients from Netflix to single productions.

The site is equipped to deliver Authoring Services, DCP Mastering, Broadcast QC, Metadata Capture, 4K and 8K viewing and proofing rooms and is the hub for our Asset Management system "Media Room".

Our Sydney office now boasts the revolutionary Distributor, Promoter and Exhibitor service **CINEMA DIRECT** bringing live and new release content to city and regional exhibitors.

MELBOURNE

68 – 72 York St, South Melbourne, VIC

Silver Trak's first satellite office, it is ideally positioned to service the Melbourne and surrounding regional centres. Connected by high-speed internet lines with the Sydney office the office provides the ideal sales face for an expanding production and media market.

Commenced in 2017 – the office of 2 personnel now provide key services and communication for several local and interstate commercial and government clients and is the primary liaison point for Queensland Rail onboard entertainment since 2017 and reappointed in 2022.

CANBERRA

DAMsmart - 32 Essington St, Mitchell, ACT

Acquired in 2018 DAMsmart is the largest commercial digitisation facility in Australia and has over the years handled some of the most significant archival collections from within Australia and Internationally.

As a preferred supplier to the National Film Archive and the National Film and Sound Archives, DAMsmart has been recognised nationally as the best digitisation and format conversion facility in the country.

Outside of Australia DAMsmart has played a significant part in the Archival conversion for locations such as Hong Kong and South Africa and continues to expand into the Asian markets as facilities across these areas dissipate and demand increases. Film and Tape libraries not converted to digital within the next few years will be lost forever.

Capabilities include all film and video formats including all film and 2", 1", U-matics, as well as more modern formats of HDCams, BetaCams, etc. In addition, DAMsmart houses a variety of audio conversion equipment and skills and offers a complete conversion transformation to digital format.

MALAYSIA

DAMsmart/Silver Trak – 1A Jalan Tandang, 46050, Pet Jaya

The newest of the Silver Trak expansion our DAMsmart Malaysian office opened in July 2019 in response to the growing inquiry for a commercial digitisation facility and to service an expanding interest in online streaming services.

Asia has been a significant force in producing local and international content for many years and many countries hold substantial film and tape archives that are at risk of deterioration. DAMsmart's reputation for quality conversion work holds solid support throughout the region, but transport costs for moving physical formats to Australia was a continual barrier. Opening the Malaysian office is a positive step in bridging this barrier and a welcomed opportunity.

Additionally, the technology growth and consumer demand for entertainment streaming services like Netflix have opened opportunities for Silver Trak's unique competence and skills in the Aggregation and QC area.

The Malaysian office is our steppingstone to the Asian market and a significant foothold into the region, with support service coming via rapid internet transfer from our Australian offices; Malaysia will be the growth centre over the next five years.

NEW ZEALAND

Silver Trak Digital– 3D Delta Ave, New Lynn, Auckland, 0600

Opening our first New Zealand office in Auckland in February 2020, the target is to extend both Silver Trak Digital and DAMsmart service through the region.

With existing New Zealand clients supported by Silver Trak and DAMsmart services from Australia, our new Auckland office opens new opportunities and demonstrates our commitment to the local market through both the physical presence and local employment.

Seeing market growth in production from local and international content creators the decision to establish a New Zealand facility to support the growth was inevitable. The Silver Trak Digital high-end post-post technical services are well placed to benefit both production and post-production industries. Similarly our Aggregation/Content Prep and QC service blend nicely to facilitate the expanding OTT and Streaming services market.

On the other side of the market New Zealand holds substantial film and tape archives at risk of deterioration, remaining undigitized due largely to the substantial transport costs in moving physical formats to Australia. Bringing the DAMsmart quality conversion work local to the New Zealand market provides solid support for this critical work both locally and throughout the region.

Combining with our offices in Australia and Malaysia, the New Zealand office solidifies the Silver Trak/DAMsmart service and advances the technology presence in the Asia/Pac region.
